

Chemically Treated PET Layer

PET Core Layer

Peelable PET Layer

SUPCOAT

BT 7011 PPL

Description

SUPCOAT BT 7011 PPL is a transparent biaxially oriented polyester (BOPET) film with peelable seal property. Other side is treated.

Please contact with our sales department for other available thicknesses.

Properties

- Peelable seal to PP
- Superior mechanical strength
- Excellent stiffness
- Excellent machinability and flatness
- Good dimensional stability
- Excellent chemical resistance
- Easy open peelable seals

Applications

It is specially designed for use in lidding applications where peelable seal property is needed to substrates like PP.

Treated side may be used as printing surface, but should be approved with present ink and glue systems used including aging tests.

Please contact customer service representative for the application compliance.

Regulatory Status

Our product complies with the applicable EC legislation on packaging involving direct contact with foods except metallized films. Full details are given on the Regulatory Compliance Certificate and can be found on our web site.

The information contained in this data sheet is true and accurate according to current state of our knowledge and intended to give general information on our products and their applications. Above values are to be considered as guidelines and not as product specifications. Since the actual conditions of use are beyond our control, users are advised to make their own tests at their specific conditions of laboratory and/or actual use. We suggest our customers to determine final suitability for their specific end uses.

Also be advised that information on this data sheet shall not be construed as an inducement or recommendation to use any process or to manufacture or use any product in conflict with existing, pending or future patents. The film shelf life is 6 months. Modified PU based ink series offer good adhesion and printability.
