EU Food Contact

We confirm that the production of our films that Süper Film supplies to the customer is made only from the materials sanctioned by EC Regulations for food contact packaging.

All components are in conformance with **COMMISSION REGULATION (EU) No 10/2011 of 14 January 2011** including its amendments (EU) No. 1282/2011 of November 28,2011, (EU) No. 1183/2012 of November 30,2012, (EU) No. 202/2014 of 3 March 2014, (EU) No.2015/174 of 5 February 2015, (EU) No. 2016/1416 of 24 August 2016, (EU) No. 2017/752 of 28 April 2017, (EU) No. 2018/79 of 18 January 2018, (EU) No. 2018/213 of 12 February 2018, (EU) No. 2018/831 of 05 June 2018, (EU) No. 2019/37 of 10 January 2019, (EU) No. 2019/1338 of 8 August 2019, (EU) 2020/1245 of 2 September 2020, (EU) 2023/1442 of 11 July 2023, (EU) 2023/1627 of 10 August 2023, **(EU) 2023/2055 of 25 September 2023 amending Annex XVII to Regulation (EC) No 1907/2006** on plastic materials and articles intended to come into contact with food or national legislations as listed.

We also remind that all products except metallized films are suitable for direct food contact applications while metallized films are for indirect food contact applications.

**All properties which has been tested and proven are included in Technical Data Sheet.*

Canada: Domestic Substances List (DSL)

Our products are in compliance with COMMISSION REGULATION (EU) No 10/2011.

Country-based statements have been added to Regulatory Compliance Certificate for specific customer request and it is valid within the time of declaration release date. However, with respect to our product compliance policy, we are regularly following up the EU regulations. So that it is customer responsibility to check any updates with respect to country specific regulations and inform Super Film Regulatory Affairs if there is any specific request.

Whereas Super Film Amb. San. and Tic. A.Ş. supplies to its customers the adequate information to allow them to fulfil their own responsibilities, the converters do have to check and confirm that the final article meets both the technical and regulatory requirements of the application.

Migration Test - EC

We confirm that the films complies with the migration testing of the regulation EU 10/2011 and its amendments.

In accordance with Commission Regulation (EU) 2016/1416, the overall migration shall not exceed 10 mg/dm² from plastic materials and articles, with the exception for plastic materials and articles intended to contact infant or child food (60mg/kg).

Our films are tested under the conditions 4 hours at 100°C (OM6) in the three standard food simulants; olive oil (simulant D2), acetic acid solution (simulant B) and ethyl alcohol solution (simulant A), show that the overall migration limit of 60 mg/kg or 10 mg/dm² food is not exceeded in accordance with European Standards ENV- 1186:2002.

Compliance with the overall and specific migration limits as described above must be measured from the final packaging intended to come into contact with food stuff by using real food or appropriate food simulants at the intended and foreseeable conditions of use as specified in Annex III of Commission Regulation (EU) 2016/1416. It is

the responsibility of the converter or food packer to verify that the final packaging complies with the overall and specific migration limits as set out by the applicable legislation.

Specific Migration & Dual use substances (Food additives)

We would like to confirm that our films contain some SML substances according to EU commission 10/2011 and some dual use additives according to EU 1333/2008 (and its amendments).

We confirm that we got all SML information of our raw materials from our suppliers and according to our worst case calculation for our formulations, we do not exceed specific migration limits. Maximum usage quantity is given by raw material suppliers and the films are formulated accordingly to not to exceed specific migration limits.

Total packaging structure are beyond the control of SUPER FILM and are a part of the responsibility of the user of our product.

The thickness of the product is assumed min 10 / max 80 micron and the ratio of the area that comes into contact with foodstuffs to the volume, based on which the conformity of the material has been established is: 6 dm² of film per 1 kg of foodstuff.

Specific migration analysis is not performed for products that comply with the overall migration limits except for special cases. (Article 11(2) - (EU) No 10/2011)

According to COMMISSION REGULATION (EU) No 10/2011; recommended conditions for specific migration analysis: A, B, D2 Simulants for 10days at 60° C.

SML information is given for special for film code as confidential document. Please contact with sales department.

REACH / SVHC

Süper Film is committed to fully respect REACH legislation and will only use fully REACH compliant raw materials.

We are aware of the new European Community Regulation (EC 1907/2006) titled REACH (Registration, Evaluation, Authorization and Restriction of Chemical substances) which entered into force on 1st June 2007.

According to the definition given in Article 3 number 3 of Regulation (EC) No 1907/2006 (REACH) and the Technical Guidance Document on requirements for substances in articles, packaging films are regarded as articles, since their form or surface determines their function to a greater degree than does their chemical composition. Articles don't require registration under REACH.

We also declare that our films contain no substances of very high concern (SVHC) list published at ECHA website updated 07.11.2024 are present in products which are produced by SÜPER FİLM AMBALAJ SANAYİ VE TİCARET A.Ş.

Notwithstanding the fact that the substances referred to in this declaration have not been intentionally added during the production process of the Süper Film products, the absence of such substances has not been verified by analysis or

tests and is therefore declared to the best of our knowledge and based on the information available to us from our raw material suppliers.

It can therefore not be excluded that trace levels of these substances may be unintentionally present (amongst others because they may be ubiquitous in the environment) or may result from the specific characteristics of the raw materials or the manufacturing process and are therefore not picked up by our quality control.

This declaration does not warrant any specific properties and does not relieve processor from carrying out its own in-house tests and inspections amongst others to determine their suitability for a particular purpose.

Our guarantee is not cover any subsequent modification of the composition of the products, whatever that modification may be, any usage which might produce a denaturalized material, inappropriate use of material or objects.

Absence of substances and chemicals

In the films which are produced by SÜPER FİLM AMB. SAN. VE TİC. A.Ş. that we supply you, we can say that they are not formulated with below mentioned substances, which means that we do not intentionally use it as a raw material. And this is also declared and certified by our raw material suppliers. Therefore we do not expect they are presence. However, products have not been tested for these chemical materials.

Recycling

Our films are produced only from virgin resins and do not contain post-consumer recycled components, and no obligation exists under the legislation.

We declare that our products do not contain any outsourced recycled material.

We only use in-house recycled material in our production. Scraps are recycled in a clean area and be used in regranulated form in our production taking care of the type of the film produced and at a limited percentage as an industrial fact and practice.

Also, we declare that BOPP, BOPET and CPP films can be recyclable; in most cases, mechanical recycling can be performed.

Non-Intentionally Added Substances (NIAS)

Non intentionally added substances (NIAS) are all chemical substances which are not intentionally added and do not have an intended or specific function within the final food contact material.

Our products comply with the requirements of Commission Regulation (EU) No 10/2011, including Regulation (EC) No 1935/2004. A NIAS assessment has been considered in accordance with Article 19 of Commission Regulation (EU) No 10/2011, in compliance with Article 3 of Regulation (EC) No 1935/2004.

This letter confirms that all raw material suppliers of SUPER FİLM AMBALAJ SANAYİ VE TİCARET A.Ş carry out screening tests to determine the presence and levels of Non-Intentionally Added Substances (NIAS) in the products and it is confirmed that there is no NIAS issue related with the raw materials thus the Products of Super Film.

GMP / Food contact

The production and distribution processes of films have been submitted to a systematic review in regards to Good Manufacturing Practices as defined by the framework Regulation (EC) 1935/2004 and the "GMP" Regulation (EC) 2023/2006 as amended. As a result of this review, Süper Film Amb. San. Ve Tic. A.Ş. can state that the production
