

Treated Sealant Layer

Polypropylene Core Layer

Low SIT Layer

SUPERSEAL

4021

Description

SUPERSEAL 4021 is a transparent, coextureded biaxially oriented polypropylene (BOPP) film. Both sides heat sealable. One side treated with standard sealing layer. Other (non-treated) sealing layer has low SIT (Seal Initiation Temperature) down to 80°C (176 °F).

Single ply and/or lamination substrate where the low SIT is needed. Specially designed for vacuum metalization applications. Metal should be coated on treated side.

It can be also used as base film for industrial applications including packaging applications where low SIT and strong heat sealability is required. It has excellent adhesion towards different ink, coating and adhesive systems including UV based.

Properties

- Excellent wide sealing range with low SIT
- · Excellent hot tack and heat seal strength
- A to B sealing capability
- Excellent ink, coating and adhesive adhesion
- Good moisture barrier
- · Excellent resistance to chemicals, greases and oils
- The film shelf life is 12 months

"Product Identification (Decision 97/129/EC): PP5"

Regulatory Status

Our product complies with the applicable EC legislation on packaging involving direct contact with foods except metallized films. Full details are given on the Regulatory Compliance Certificate and can be found on our web site.

The film can also be supplied with ISCC+ certified raw materials with the category of bio-circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPCYCLE. SUPRENEW and SUPCYCLE products are certified with "Mass Balance" chain of custody system under ISCC+ and due to chemical processing of the feedstock, there is no compromise & change on any specific feature of the film given in this TDS regardless of the sustainable content in the film. Therefore all product properties of this film covers the same product code with SUPRENEW or SUPCYCLE brand. Three digits will be added to the end of the ISCC+ certified product code. SUPRENEW products will be differentiated with Rxx (R will communicate that the film is circular xx code will communicate the sustainable content % of the film) and SUPCYCLE products will be differentiated with Pxx (P will communicate that the film is circular xx code will communicate the sustainable content % of the film). Further details of the sustainable content of the film will be given in the Sustainability Declaration (SD) prepared for each ISCC+ certified order.

The information contained in this data sheet is true and accurate according to current state of our knowledge and intented to give general information on our products and their applications. Above values are to be considered as guidelines and not as product specifications. Since the actual conditions of use are beyond our control, users are advised to make their own tests at their specific conditions of laboratory and/or actual use. We suggest our customers to determine final suitability for their specific end uses.

Also be advised that information on this data sheet shall not be construed as an inducement or recommendation to use any process or to manufacture or use any product in conflict with existing, pending or future patents.
