# SUPWHITE 2211 / 2212

### Description

SUPWHITE 2211 and 2212 are white pigmented, coextruded, biaxially oriented polypropylene (BOPP) film. Both sides heat sealable. One or both sides treated.

White colored heat sealable film for general packaging applications. It can be used on HFFS and VFFS packaging machines. It can be used as single ply surface print and lamination substrate to itself and other films.

White color also saves white base color print.

### **Properties**

- White appearance
- · Outstanding opacity and gloss
- Broad seal range and hot tack
- Good hot slip
- · Excellent resistance to chemicals, greases and oil
- · Excellent ink and coating adhesion
- The film shelf life is 6 months for 2211, 3 months for 2212

#### "Product Identification (Decision 97/129/EC): PP5"

**Regulatory Status** 

Our product complies with the applicable EC legislation on packaging involving direct contact with foods except metallized films. Full details are given on the Regulatory Compliance Certificate and can be found on our web site.

The film can also be supplied with ISCC+ certified raw materials with the category of bio-circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPRENEW and category of circular feedstock under the product group of SUPCYCLE. SUPRENEW and SUPCYCLE products are certified with "Mass Balance" chain of custody system under ISCC+ and due to chemical processing of the feedstock, there is no compromise & change on any specific feature of the film given in this TDS regardless of the sustainable content in the film. Therefore all product properties of this film covers the same product code with SUPRENEW or SUPCYCLE brand. Three digits will be added to the end of the ISCC+ certified product code. SUPRENEW products will be differentiated with Rxx (R will communicate that the film is circular xx code will communicate the sustainable content % of the film) and SUPCYCLE products will be differentiated with Pxx (P will communicate that the film is circular xx code will communicate the sustainable content % of the film). Further details of the sustainable content of the film will be given in the Sustainability Declaration (SD) prepared for each ISCC+ certified order.

The information contained in this data sheet is true and accurate according to current state of our knowledge and intented to give general information on our products and their applications. Above values are to be considered as guidelines and not as product specifications. Since the actual conditions of use are beyond our control, users are advised to make their own tests at their specific conditions of laboratory and/or actual use. We suggest our customers to determine final suitability for their specific end uses.

Also be advised that information on this data sheet shall not be construed as an inducement or recommendation to use any process or to manufacture or use any product in conflict with existing, pending or future patents.

For related spec sheet with tolerance values, please contact our sales departments

STANDARD ROLL DIMENSIONS
